

Gandhodi Jayanth

Front-End / MERN Stack Engineer with 6+ years of experience building scalable web and geospatial applications. Specialized in React, TypeScript, and interactive map-based systems (OpenLayers, Leaflet), with backend expertise in RestAPI and Node.js. Delivered high-performance applications with up to 30% performance improvement, real-time data systems using WebSockets, Dockerization, and scalable cloud deployments on AWS. Strong experience in leading teams, designing system architecture, and translating complex business requirements into efficient technical solutions.

Mobile: +91-9182315311

Email: gandhodijayanth@gmail.com

Location: Bengaluru

CORE COMPETENCIES

- Front-End Architecture (React, TypeScript)
- State Management (Redux, Zustand)
- Geospatial Applications (OpenLayers, Maps)
- Full-Stack Development (Node.js, Express, REST APIs, GraphQL APIs)
- Real-Time Systems (WebSockets, MQTT)
- Performance Optimization & SPA Tuning
- Cloud & Deployment (AWS, Docker)
- Technical Leadership & Code Reviews

TECHNICAL SKILLS

Frontend: ReactJS, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, D3.js (Data Visualization)

State Management: Redux, Zustand

Backend: Node.js (Express), REST APIs

Database: PostgreSQL, MongoDB

Cloud & DevOps: AWS (S3, CloudFront, API Gateway, Lambda), Docker, CI/CD (Basic)

Mobile Application Development: React Native, Ionic Framework (Cross-Platform: Android & iOS)

Data & Integration: API Integration, WebSockets, Real-time Systems(MQTT)

Geospatial: OpenLayers, Leaflet, Google Maps

Automation & Testing: Cypress

Tools: Git, GitHub, SVN, VS Code

WORK EXPERIENCE

April 2023- Nov 2025 : Software Engineer - Full Stack Developer

Zimeno India Private Limited-Monarch Tractor, Hyderabad

Jan 2023- March 2023 : Front End Developer

Invento Labs

Sep-2021 to Dec-2022 : - Front-End Developer

TeamLease Pvt Ltd-Accenture, Bengaluru

Jun 2021 Aug 2021 as Associate Software Engineer- Application Developer

AFC Digital Pvt Ltd

Key Result Areas:

- Led front-end architecture for scalable geospatial applications using React and OpenLayers
- Built reusable component libraries and implemented state management using Redux/Zustand
- Developed RESTful APIs using ExpressAPI with PostgreSQL, ensuring high performance and reliability
- Implemented WebSocket-based real-time systems for live tracking and telemetry data
- Containerized backend services using Docker, improving deployment consistency

- Improved application performance by ~30% through optimization techniques
- Mentored 3+ developers and conducted code reviews to maintain code quality
- Built scalable backend services using Node.js (Express.js) and MongoDB, supporting efficient API integrations

EDUCATION

- **M.B.A in** Hospitality and Human Resource Management from Bharathiyar University, Coimbatore, with 73% in June 2019.
- **B.Tech in Electrical & Electronics Engineering** from ViT Chennai, 7.09 CGPA in July 2017.

KEY PROJECTS

Monarch Tractor – Autonomous Platform (React, TypeScript, OpenLayers)

- Developed real-time geospatial UI using OpenLayers for tractor tracking and field operations
- Integrated WebSocket-based telemetry for live updates and mission monitoring
- Optimized map performance for large-scale datasets and smooth interactions
- Implemented scalable state management using Zustand
- Led UI development and mentored team on geospatial and performance best practices
- Improved application performance by ~30% through optimized rendering and state management
- Developed RESTful APIs + GraphQL APIs using Node.js and Express and Apollo Server
- Designed and implemented CRUD operations with MongoDB
- Implemented authentication and authorization (JWT-based)

Auger Smart Screen (ReactJS, ElectronJS, Express.js, MongoDB)

- Architected and developed a high-performance, event-driven MERN stack application optimized for an IoT vehicle dashboards, utilizing ElectronJS for a robust cross-platform desktop experience.
- React-Typescript(Electron Dashboard) -> Node.js + Express API (Rest API's) -> MQTT&WebSocket.
- Implemented Global State Management in React using Redux and React Query Tanstack for server cache
- Integrated real-time geospatial UI using OpenLayers for vehicle location and field operations
- Designed and implemented CRUD operations with MongoDB
- Integrated APIs with frontend applications, ensuring secure data flow

Customer Service Portal (Evernorth CSP) - (Health Care) - (ReactJS, Redux, Jenkins, Sonarcube)

- Developed scalable single-page applications (SPA) using React.js, Redux, JavaScript (ES6+), and component-based architecture with reusable and maintainable UI components.
- Built responsive, cross-browser compatible, and user-centric web interfaces using React.js, HTML5, CSS3, and modern frontend development best practices.
- Integrated RESTful APIs and handled dynamic data rendering, state management, and interactive UI behavior for seamless frontend functionality.
- Optimized frontend performance through efficient state management, component rendering, and lazy loading, and code splitting techniques.
- Worked extensively on UI development, debugging, bug fixing, and enhancing application usability, accessibility, and performance.
- Collaborated in Agile (Kanban) environments, participated in code reviews, and performed unit testing to improve application stability, quality, and reliability.

E-Service Delivery (Cigna Migration to CSP) - (Health Care) - (JavaScript (ES6+), HTML, CSS, JSP, and AJAX)

- Migrated legacy web application from Internet Explorer to modern browsers by analyzing compatibility issues and implementing fixes using JavaScript (ES6+), HTML, CSS, JSP, and AJAX.
- Performed cross-browser testing and debugging to identify UI/UX issues, ensuring responsive design and improved application performance.
- Refactored and optimized the frontend codebase using modern JavaScript standards to enhance maintainability

- and scalability.
- Integrated CI/CD pipelines using Jenkins for automated build, test, and deployment processes, improving release efficiency.
- Used Git for version control, code management, and collaboration in Agile environments.
- Accessed server logs using WinSCP tool to troubleshoot production issues, perform root cause analysis, and improve application stability.
- Collaborated with cross-functional teams to deliver high-quality, user-centric solutions aligned with business requirements.

AFC Digital | Power Apps Developer

- Developed and customized business applications using Microsoft Power Apps to automate workflows and improve operational efficiency.
- Built user-friendly forms, dashboards, and process-driven applications based on business and client requirements.
- Integrated Power Apps with data sources such as SharePoint, Excel, and other business systems for seamless data handling and reporting.
- Implemented business logic, validation rules, and workflow automation to streamline manual processes and enhance productivity.
- Collaborated with stakeholders to gather requirements, troubleshoot issues, and deliver scalable low-code solutions.
- Performed testing, debugging, and application enhancements to ensure reliability, usability, and a smooth user experience.
- Gained strong exposure to UI development, requirement analysis, and enterprise application support as a fresher in a professional software development environment.

Other Projects

- Medaram (Event Management) – ReactJS
- DEMS (Disaster Management) – ReactJS

Mobile Applications (React Native)

- Developed cross-platform apps (Android/iOS) using **Ionic & React Native**
- Delivered applications including **PowerPic, Sebooha, and IELTS7Band** with API integrations and scalable UI components

React Applications

- Built **Nexus Admin Dashboard** for user management, analytics, and operational workflows
- Developed **Monarch Customer Mobile App** with real-time data integration.

Additional Information

Languages: English, Tamil, Telugu, Hindi

Availability: Open to Full-Time Opportunities

Location Flexibility: Open to Relocation| Remote / Hybrid Work

Interests: System Design, Real-time IoT Applications, Cloud Computing (AWS), and DevOps Practices.

Declaration

I hereby declare that all the details furnished above are true to the best of my knowledge.
